

# THE FEDERAL BUDGET

By Antonio Abbatiello and Aidan Ranck

# FEDERAL BUDGET PIE CHART

A German Shepherd dog with tan and black fur is sitting on the left side of the frame. It has a black collar with a silver tag. In the background, several soldiers in camouflage uniforms are seated. One soldier in the center is holding a green box of M&M's candy. The setting appears to be the interior of a military vehicle or a similar confined space.

## MILITARY (25%)

We believe that a higher military budget will help the teams to survive with new modern weaponry and have a higher pay. It will also secure our borders against outside threats such as the 9/11 attacks.

# CORPORATE WELFARE OFFICE

## WELFARE (40%)

U.S. TREASURY

We gave Welfare a smaller portion of the budget because we think the people getting welfare are cheating the system. We will use 5% for WIC, 5% for TANF, 20% for Social Security, 5% for Medicare, and 5% for SSI.

# GENERAL GOVERNMENT (5%)

General Government is higher than usual because in order to keep Americans happy and in line we have to keep them happy and safe. In using this money, we will work on the roads and give our people(government workers) a higher pay.

## DEBT (6%)

We are using 6% for debt to pay it off faster. We will use it for paying off China and any of the other countries we have fallen in debt with. We will also pay off the interest of the debt.

## SCIENCE (4%)

We gave Science 4% of the budget because in order to make America a better place we need more inventions. With this money, I hope to be able to make a motor be able to run on water. We will also help make the lives of our fellow soldiers better by making exo-suits that run off of solar energy for them .

# EDUCATION (4%)

We chose to bump up the spending on education because schools need to bring back old classes such as geology, and also to add new class that teaches kids about things that they will need later in life.

## HEALTH (6%)

Health is raised because in order to become a better society we need better cures and health equipment. And when we find new diseases we can find and have more money to spend on curing these diseases.

# AGRICULTURE (5%)

We chose to raise the budget on Agriculture because we wanted to feed more people of our growing population. We also wanted to spend more money on trying to improving farming and growing methods.

# TRANSPORTATION (5%)

Transportation was raised because we wanted to improve our current road system and to fix any problems with in now. We wanted to also wanted to try and add new and safer roads.

# SCENARIO: ZOMBIES!!!!

The world has started to end and our wonderful nation is falling apart. We decided to boost the funding on our military to a whopping 39%; health was also raised to help out with the cure at 18% now. Agriculture was raised to 20 plus Transportation and Science was raised to 10% to find cures for this madness!!

The programs that we chose to take away were: Welfare, General Government, Debt, and Education.

# Scenario Continued

We chose to add to Military to try to stop the hordes that would sweep through the country.

We added to Agriculture because we need to grow our farms as much as possible to try and survive.

Transportation was raised to try and send the military to places in the country and the borders to fight the zombies

# SCENARIO CONTINUED PART 2

Welfare was taken away from because most of the homeless, disabled, and poor would be the first to go.

Debt was also taken away from because there would be no one to pay money back to if we didn't survive.

Education was reduced a little because we wouldn't need as much to educate kids to defend themselves against the zombies.
